Stephanie Katharine Loeb

Academic title(s):

Department of Civil Engineering and Applied Mechanics Assistant Professor McGill University

Department: Mechanical Engineering

Current research:

Civil Engineering

In the Loeb research group, our goal is to develop fundamental knowledge and technical solutions that can aid society in maintaining and protecting a healthy environment and resilient infrastructure. Light is a ubiquitous source of energy. We aim to understand how light from natural and artificial light sources drives environmental processes, and to develop novel light harnessing materials-based processes for environmental remediation.
